Project Brief: Greenleaf Bakery

About us: Greenleaf Bakery is a family-run neighbourhood bakery. We sell bread, pastries and custom cakes.

What we need: A one-page website (landing page) that shows our menu highlights, opening hours, location and a way for customers to order custom cakes by filling in a form.

Nice to have: online payment for cake deposits, and the site should look good on phones because most of our customers find us on Instagram.

Content: we have photos and a logo. We have no domain or hosting yet.

Budget: about $650.

Timeline: we would like to launch in 2 weeks, before the holiday season.
